

At Track Works, we believe in providing the quality and detail oriented work to fully complete the needs of our clients. With an emphasis of customer service and not cutting corners, we will provide you with qualified and attentive work and take ownership of the work we accomplish for you.

## Demolition and Land Clearing

Reclaim Your Unusable Space!

**Don't get burned**  
Up to 40% in cost overruns are from inadequate allowances, set by unrealistic contractors.

# Our Platinum packages include a One year workmanship guarantee

## Demolition

Demolition can be perilous and exhausting. However, when completed by an experienced professional, the job can play a vital role in revitalizing and clearing spaces needed for development.

When you contract the demolition services at Track Works, you can be rest assured that everything will be handled from top to bottom. Our full-service team had all of the necessary experience, materials and equipment needed to turn your space into a flat site ready for your project, safely and in a timely manner.

Our demolition services include:

- Concrete and rock demolition
- Structures (houses, sheds, shops etc.)
- Land clearing
- Hauling
- Grading
- Site preparation
- Underground tank removal
- Demolition machines
- And more

## Land Clearing

Land clearing has received a bad name for potentially causing soil corrosion. Track Works combats that problem by mulching the underbrush and adding it back to the soil, providing stability and nutrients. We customize our land clearing to your particular needs, and our many years of experience can contribute to helping you create the ideal foundation blueprint.

Whether it's stumps, trees or brush, our team of trained experts can clear out any trees and vegetation. With safety and precision, we have the expertise needed to complete and clear out any type of vegetation, regardless of the difficulty.

Our land clearing services include:

- Removing brush
- Trees
- Brush clearing
- Brush mowing
- Mulching of all underbrush
- Trees and vegetation
- Low impact grading
- Machine grading and digging
- Tree stump removal
- Driveways
- Roads
- Building pads
- Site preparation
- Hauling
- Grading
- And more
